sketch	invision
illustrator	ux research
photoshop	after effects

languages
english	mandarin
cantonese	

OBJECTIVE

Seeking a **UX/UI** design and **front-end** development opportunity where I can deliver engaging user experiences with my sense of aesthetic, strong problem-solving skills, as well as a solid understanding of web technologies.

EXPERTISE

Front-End Development

- Strong foundation in HTML, CSS, and ES5/6
- Proven experience in leading small- to mid-scale Angular projects
- Solid understanding of limitations and workarounds for building complex UI
- Proficiency with responsive web design and techniques
- Experience with React and Redux
- Knowledge of backend technologies like Express and MongoDB

UX/UI Design

- A keen eye for typography, layout, color, consistency, and subtle details
- Extensive experience in creating UI components, hi-fi design, and prototypes using Sketch / InVision
- Foundation of data visualization
- Analytical thinking for solving complex design problems
- Experience with user-centered design and UX research methodologies
- Creativity and deep empathy

WORK EXPERIENCE

Front End Developer, UX Designer
SLAVIC401K, BOCA RATON, FL — 09/2017 - Current

- Lead AngularJS and Angular 2+ projects on both design and front-end development; write unit tests with Jasmine; collaborate with backend team to design REST & JSON-RPC APIs
- Create user flows, wireframes, and prototypes to quickly iterate products
- Write Gulp tasks for building front end projects
- Establish design guidelines for web apps; craft UI components in Sketch and maintain UI libraries with Sass and NPM
- Design marketing emails and use Pug (Jade) to build templates that are consistent across email clients
- Create interactive visualization to provide insights into data using D3.js

Graduate Assistant
UNIVERSITY OF MIAMI, CORAL GABLES, FL — 01/2017 - 05/2017

- Design user experience and UI for Oculus VR projects and develop with C# and Unity

Web Developer, VFX Artist
VWEED MEDIA, SHENZHEN, CHINA — 09/2014 - 03/2015

- Develop marketing websites using HTML, CSS, JavaScript, and Bootstrap
- Collaborate with designers to create motion graphics using After Effects
